Richard's Ramble: This year the teaching series is focusing on Jesus the Messiah. He is, of course, the focus of our faith. In coming to earth and laying aside his majesty, he achieved what could be achieved no other way: reconciliation between us and God; between the creation and the creator; between heaven and earth. He is the bridge (or to use the Biblical word, Mediator) between the Father and Humanity. He is the one who came to make a way where there was no way so that all of creation could come back into Divine order – back under the authority of the King of Kings. The more we understand the person and mission of Jesus, the greater is our sense of thankfulness and worship, and the bigger the need to tell others so that they too can come into this same relationship with the creator and sustainer of all things.

The world is generally oblivious of its need of God. Obsessed with the material realities of life, and putting all thoughts of eternity to one side, people go about their daily lives not realising what they are missing out on, and also the peril they are in. It may be a trite thing to say but Jesus really is the answer (now what is the question?). This month, remember you have the answer to the world's problems and in you is the hope of eternity.

God bless

Richard

FEATURING THE 21-DAY BRAIN DETOX PLAN

SWITCH ON YOUR BRAIN

The Key to **PEAK HAPPINESS, THINKING, and HEALTH**

DR. CAROLINE LEAF

I already knew that our thoughts were powerful and that changing them makes a difference to our mental and physical health, however, I had not realised just how powerful our thoughts were until I read this book. Dr Caroline Leaf explains how changes in our thinking actually makes changes in the brain and how we damage our brains with negative thinking - it has made me much more determined not to allow myself to wallow in negative/toxic thinking but to focus on positive truths instead. This new determination has re-

sulted in me sorting out sleeping issues, simply by changing my thinking. Dr Caroline Leaf is a Christian and she explains how the brain works and how this lines up with the Bible. There's things in the book which really blow your mind, like how two people were meditating together, they were then separated and a light was shone into the eyes of one of them which lit up parts of their brain - the other person's brain lit up in the same places at the same time, without seeing or even knowing about the light. This is part of a section about the power of prayer. Definitely worth a read.

Angie.

Date for Diary:
